

I CLAIM:

1. A component for ground covers for trees and bushes consisting of
 - a) a substantially non-transparent plate;
 - 5 b) said substantially non-transparent plate having a rim strip at each rim;
 - c) said rim strip being a substantially non-transparent strip protruding from said each rim of said substantially non-transparent plate in an about right angle to the top surface of said substantially non-transparent plate;
 - d) said substantially non-transparent plate having a penetrable area in plural
10 form;
 - e) said penetrable area being a short tube with a breakable cover;
 - f) said breakable cover being able to allow a substantially pin-liked object to break and penetrate through;
 - g) said substantially non-transparent plate having a weakened zone in plural
15 form;
 - h) said weakened zone spanning inclusively from one said rim strip of said substantially non-transparent plate to the other said rim strip of said substantially non-transparent plate;
 - i) a portion of said substantially non-transparent plate being severable along
20 said weakened zone;
 - j) along an edge of each said weakened zone said substantially non-transparent plate having a weakened zone strip which is a substantially

non-transparent strip protruding in an about right angle from the surface of
said substantially non-transparent plate.

2. A component for ground covers for trees and bushes of claim 1 wherein said
5 breakable cover being a diaphragm of said short tube of said penetrable area.
3. A component for ground covers for trees and bushes of claim 1 wherein said
weakened zone strip having a sharp edge.
- 10 4. A component for ground covers for trees and bushes of claim 1 wherein said rim strip
having a sharp edge.
5. A component for ground covers for trees and bushes of claim 1 wherein said rim strip
which will not butt against other said component protruding on both sides of the
15 surfaces of said substantially non-transparent plate.
6. ~~A weakened zone for ground covers for trees and bushes of claim 1 wherein said~~
~~weakened zone being a curve depicted by a series of holes on said component.~~
- 20 7. A component for ground covers for trees and bushes of claim 1 wherein said
weakened zone being a curve depicted by a series of holes on said component.

8. A component for ground covers for trees and bushes of claim 1 wherein said weakened zone being a curve depicted by a series of depressed areas on said component.
- 5 9. A component for ground covers for trees and bushes of claim 1 wherein said substantially non-transparent plate having a slightly concave top surface.
- 10 10. A component for ground covers for trees and bushes of claim 1 wherein said substantially non-transparent plate having a hole in plural form for air and water to penetrate through.
11. A component for ground covers for trees and bushes consisting of
- a) a substantially non-transparent plate;
 - b) said substantially non-transparent plate having a rim strip at each rim;
 - 15 c) said rim strip being a substantially non-transparent strip protruding from said each rim of said substantially non-transparent plate in an about right angle to the top surface of said substantially non-transparent plate;
 - d) said substantially non-transparent plate having a penetrable area in plural form;
 - 20 e) said penetrable area being a short tube with a breakable cover;
 - f) said breakable cover being able to allow a substantially pin-like object to break and penetrate through;
 - g) said substantially non-transparent plate having a weakened zone;

- h) said weakened zone spanning inclusively from one said rim strip of said substantially non-transparent plate to the other said rim strip of said substantially non-transparent plate;
 - i) a portion of said substantially non-transparent plate being severable along said weakened zone;
 - j) along an edge of said weakened zone said substantially non-transparent plate having a weakened zone strip which is a substantially non-transparent strip protruding in an about right angle from the surface of said substantially non-transparent plate.
- 10
12. A component for ground covers for trees and bushes of claim 11 wherein said breakable cover being a diaphragm of said short tube of said penetrable area.
13. A component for ground covers for trees and bushes of claim 11 wherein said weakened zone strip having a sharp edge.
- 15
14. A component for ground covers for trees and bushes of claim 11 wherein said rim strip having a sharp edge.
- 20
15. A component for ground covers for trees and bushes of claim 11 wherein said rim strip which will not butt against other said component protruding on both sides of the surfaces of said substantially non-transparent plate.

16. A component for ground covers for trees and bushes of claim 11 wherein said weakened zone having at least a groove on said component.
17. A component for ground covers for trees and bushes of claim 11 wherein said
5 weakened zone being a curve depicted by a series of holes on said component.
18. A component for ground covers for trees and bushes of claim 11 wherein said weakened zone being a curve depicted by a series of depressed areas on said component.
- 10
19. A component for ground covers for trees and bushes of claim 11 wherein said substantially non-transparent plate having a slightly concave top surface.
20. A component for ground covers for trees and bushes of claim 11 wherein said
15 substantially non-transparent plate having a hole in plural form for air and water to penetrate through.
21. A component for ground covers for trees and bushes consisting of
- a) a substantially non-transparent plate;
 - 20 b) said substantially non-transparent plate having a rim strip at each rim;
 - c) said rim strip being a substantially non-transparent strip protruding from said each rim of said substantially non-transparent plate in an about right angle to the top surface of said substantially non-transparent plate;

- d) said substantially non-transparent plate having a penetrable area in plural form;
- k) said penetrable area being a short tube with a breakable cover;
- l) said breakable cover being able to allow a substantially pin-liked object to break and penetrate through.

22. A component for ground covers for trees and bushes of claim 21 wherein said breakable cover being a diaphragm of said short tube of said penetrable area.
23. A component for ground covers for trees and bushes of claim 21 wherein said rim strip having a sharp edge.
24. A component for ground covers for trees and bushes of claim 21 wherein said rim strip which will not butt against other said component protruding on both sides of the surfaces of said substantially non-transparent plate.
25. A component for ground covers for trees and bushes of claim 21 wherein said substantially non-transparent plate having a slightly concave top surface.
26. A component for ground covers for trees and bushes of claim 21 wherein said substantially non-transparent plate having a hole in plural form for air and water to penetrate through.
